If you are looking for company specialized in the production of custom-sized wetsuits for spearfishing and freedivers this is the brand you are looking for. To package our suits we use the best neoprene on the market like YAMAMOTO, DAIWABO HEIWA AND SHEICO.

Working closely with these manufacturers we have designed and developed exclusive neoprene. We also developed exclusive lining fabrics with special characteristics. Using a custom software program we elaborate the client's measures and develop a perfect made to measure suit. The assembly is done with the best glue on the market today. Due to the vastness of the materials and types of neoprene is able to develop the wetsuits on the need of customers, according to his needs. For more information Website
